Projects

Student admission and document verification system for higher education institutions | Python, HTML, CSS, Javascript, MySQL

- Developed a web-based student admission system enabling online application submission, document upload, and real-time status tracking to improve efficiency and transparency.
- Implemented a document verification workflow with role-based access control, ensuring secure validation of student records and reducing manual errors in the admission process.

Blockchain Integration with Cloud Storage for Secure and Transparent File Management | HTML, CSS, JavaScript, Node.js (Express), Solidity (Ethereum), IPFS/Cloud Storage, and MongoDB

- Developed a secure file management system by integrating blockchain (Ethereum & Solidity) with cloud storage (IPFS), ensuring data integrity through hash-based verification and tamper-proof records.
- Built a full-stack application using HTML, CSS, JavaScript, and Node.js (Express) with REST APIs to enable efficient file upload, access control, and transparent transaction tracking.

Certifications

- Python 101 for Data Science – IBM (Cognitive Class)
- Web Development for Beginners – Simplilearn SkillUp
